Herd book No.	64378		
Type	Growth and slaughter quality		
Family tree	S: BABS Adventius PP - D: BABS Denise Pp - PGD: VBQ Thiamin P - MGS: Rubio		
Description	Bull with extremely good production traits. The first homozygous polled bull of the Blonde d'Aquitaine breed, which in all measured properties are above the breed average.		
Performance test		Index	Test results
	Gain	<b>102</b>	638 kgs at 365 days, 1,921 gram daily gain
	Body conformation	<b>102</b>	95.6 cm <sup>2</sup> area of LD
	Feed conversion	<b>103</b>	4.09 Feed Units/kg gain
Other indices		Index	Securityd, %
	Production	<b>106</b>	40
	Growth	<b>106</b>	46

Blonde d'Aquitaine has proven to be the best beef breed when it comes to the value of the net daily gain - and this is where the money are.

Polledness is a highly appreciated functional trait in modern cattle production, not at least due to its friendliness to modern production systems, including savings on de-horning.

# The genes behind BABS Goliat PP

## F: BABS Adventius PP

BABS Adventius PP is a long and large framed homozygous all-round bull with fine bones, and with a Birth Index of 120, it is very suitable for heifers. BABS Adventius PP is photographed 13 May 2009 - the weight is 1250 kg!

## M: BABS Denice Pp

13 month old BABS Denice Pp became the Cup Winner of the interbreed group of 'Heifers under 20 months' at The National Danish Show 2009. Excellent! Her three full-brothers, BABS Don Juan Pp, BABS Dynamic Pp samt BABS Deschamps Pp, finalised July 2009 performance testing at Alestrup Breeding Testing Station with sensational results. The 392-days weight of BABS Deschamps Pp was measured at 805 kg!

## FFM: GG Ninka

GG Ninka on the pictures here is grand dam of BABS Adventius PP, and is an example of the genetic foundation of BABS - the cow, belonging to Sanne and Erik Poulsen, is after Horizon. GG Ninka is large and elegant - it was, as several times before, awarded as the best Blonde d'Aquitaine female at the Danish National Show in 2006, where it had a weight of 1,207 kg.

## MF: Rubio

Rubio is a French top sire in the absolute world elite, characterized by good beef production, and a great body conformation with a fine skeleton.

It is our objective to offer semen from relevant Blonde d'Aquitaine pedigree bulls with outstanding breeding values for growth, exterior and size. Our semen program comprises semen from our own homozygous and heterozygous polled bulls, as well as Danish horned bulls of superior body conformation. All breeding material we offer is of bulls with a typical French appearance with respect to body conformation.

The specified indices are calculated by Danish Cattle according the Animal Model method. Index figures have averages of 100 and standard deviations of 5 units, i.e. 2/3 of the calculated indices are between 95 and 105. The S-index indicates the overall economic breeding value, and is calculated after combined weighting of individual index sizes and their economic value. Indices declared with a security below 30% are not included.
